AMADEUS

# Every Traveller is Unique. So Should Be Their Packages.

Amadeus Online Suite - Dynamic Packages

Dynamic Packages

The Dynamic Packages module in Amadeus Online Suite (AOS) enables travel agencies to create and manage customized travel bundles using real-time flight, hotel, and service availability.

Travelers can personalize their itineraries with flights, hotels, car rentals, and transfers—offering both flexibility and value. Integrated with the flight inventory module, it blends custom and third-party content to deliver diverse and tailored travel options.

Tailored for Every Journey

The Dynamic Packages module targets customers engaged in vacation planning by helping travelers book flight and hotel bundles with optional car rentals for a smooth holiday experience.

It also caters to corporate travel by offering pre-defined packages that meet business requirements with flexibility in choosing services, and enables the promotion of special offers through limited-time deals bundling flights and hotels with exclusive add-ons.

Seamless Integration

The Dynamic Packages module integrates seamlessly with the AOS platform, utilizing data from the flight and Hotel inventory module and other connected suppliers.

Travel agents can access real-time inventory, define policies, and create packages that cater to specific traveller needs. Once created, these packages can be marketed and sold directly via the agency's B2C or B2B channels.

Why choose Dynamic Packages?

_ Simplifies travel planning for both agencies and end users.

_ Encourages customer loyalty through personalized service offerings.

_ Provides agents the opportunities for cross-selling and upselling additional services.

Personalization:
Create unique, personalized packages for travellers to enhance their overall experience.

Increase Revenue:
Drive sales with dynamic bundling and upselling opportunities.

Expanded Options:
Provide travellers with a wide variety of flight, hotel, and ancillary service options.

Streamlined Workflow:
Simplify the booking process with integrated solutions and a single payment option.

Operational Efficiency:
Reduce manual effort with automated and seamless inventory updates.

Real-Time Inventory Updates: Access live flight and hotel inventory for accurate pricing and availability.

Integrated Services & Reporting Capabilities:
Include car rentals, transfers, and add-ons as part of customizable packages. Generate detailed reports for better insights.

Visa Messaging: Provide automated visa-related notifications within package details.

Flexible Rules & Policies: Define specific policies, pricing structures, and booking rules tailored to agency needs.

Commercial Options: Apply custom markups, service fees, and discounts for increased revenue control.

Customizable Packages & Booking Management:
Tailor packages to traveller preferences and agency requirements. Manage bookings from creation to confirmation.
